Energy Economics

Index to Volume 7
January, April, July, October 1985

Articles – titles

Economics of nuclear power

Forecasting Canadian nuclear power station construction costs. *C. W. K. Keng*. 7.4, 241–258

Electricity supply and demand, pricing

Electricity and gas supply in south-eastern Australia, 1980–2020. *A. R. de L. Musgrove* and *K. J. Stocks*. 7.1, 37–48

Estimating energy savings due to conservation programmes: the BPA residential weatherization pilot programme. *E. Hirst* and *R. Goeltz*. 7.1, 20–28

Government policy and industrial investment in cogeneration in the USA. *G. Anandalingam*. 7.2, 117–126

The investment criteria of the Swedish electricity industry. *R. Andersson* and *L. Taylor*. 7.1, 13–19

The rise and fall of oil generation in the USA: a study in institutional adaptability. *R. L. Gordon*. 7.2, 66–76

Short- and long-run marginal cost pricing: on their alleged equivalence. *R. Andersson* and *M. Bohman*. 7.4, 279–288

Variable elasticity models for electricity demand. *W. A. Donnelly* and *M. Diesendorf*. 7.3, 159–162

Energy and the environment

Nairobi households and their energy use: an econometric analysis of consumption patterns. *E. L. Hughes-Cromwick*. 7.4, 265–278

Energy demand and energy efficiency

Demand elasticities in OECD: dynamical aspects. *R. D. Prosser*. 7.1, 9–12

Energy and resources as production factors in process industries. *J-B. Lesourd*. 7.3, 138–144

Estimating energy savings due to conservation programmes: the BPA residential weatherization pilot programme. *E. Hirst* and *R. Goeltz*. 7.1, 20–28

An evaluation of the competitiveness of the US coal market. *A. L. Soyster, R. L. Gordon, E. E. Enscore* and *Y. We*. 7.1, 3–8

Government policy and industrial investment in cogeneration in the USA. *G. Anandalingam*. 7.2, 117–126

Multivariate Box–Jenkins analysis: a case study in UK energy demand forecasting. *M. P. G. Pepper*. 7.3, 168–178

Nairobi households and their energy use: an economic analysis of consumption patterns. *E. L. Hughes-Cromwick*. 7.4, 265–278

Optimizing investment levels for energy conservation: individual versus social perspective and the role of uncertainty. *A. Rabl*. 7.4, 259–264

Pattern of UK fuel use. *H. Motamen* and *C. Schaller*. 7.4, 220–230

Residential demand for fuelwood. *C. Garbacz*. 7.3, 191–193

Structural change and technology choice: energy use in Mexican manufacturing industry, 1970–81. *T. Sterner*. 7.2, 77–86

Testing for stability: motor gasoline demand and distillate fuel oil demand. *N. D. Uri* and *S. A. Hassanein*. 7.2, 87–92

Energy–economy interactions

Elasticities, ratios and energy modelling. *F. S. T. Hsiao* and *M. C. W. Hsiao*, 7.3, 153–158

Nairobi households and their energy use: an econometric analysis of consumption patterns. *E. L. Hughes-Cromwick*. 7.4, 265–278

Pattern of UK fuel use. *H. Motamen* and *C. Schaller*. 7.4, 220–230

Structural change and technology choice: energy use in Mexican manufacturing industry, 1970–81. *T. Sterner*. 7.2, 77–86

Energy modelling

Demand elasticities in OECD: dynamical aspects. *R. D. Prosser*. 7.1, 9–12

Deregulation as a switch of regime: price effects using a modified Hotelling rule. *F. Melese* and *P. Michel*. 7.2, 93–101

Elasticities, ratios and energy modelling. *F. S. T. Hsiao* and *M. C. W. Hsiao*. 7.3, 153–158

Energy and resources as production factors in process industries. *J–B. Lesourd*. 7.3, 138–144

An evaluation of the competitiveness of the US coal market. *A. L. Soyster, R. L. Gordon, E. E. Enscore* and *Y. We*. 7.1, 3–8

The GAO natural gas supply model. *C. E. Moody, P. L. Valentine* and *W. J. Kruvant*. 7.1, 49–57

Gas trade in the European Community during the 1970s: a model analysis. *J. Boucher* and *Y. Smeers*. 7.2, 102–116

A general equilibrium framework for optimal planning in an oil-producing economy. *H. R. Seddighi*. 7.3, 179–190

Government policy and industrial investment in cogeneration in the USA. *G. Anandalingam*. 7.2, 117–126

Multivariate Box–Jenkins analysis: a case study in UK energy demand forecasting. *M. P. G. Pepper*. 7.3, 168–178

Net benefit functions, discounting and the optimal time horizon for extracting non-replenishable resources. *K. Willett*. 7.3, 163–167

Residential demand for fuelwood. *C. Garbacz*. 7.3, 191–193

A sensitivity analysis of the linear complementarity programming model: Appalachian steam coal and the natural gas market. *C. W. Yang* and *W. C. Labys*. 7.3, 145–152

State gasoline consumption in the USA: an econometric analysis. *A. Lin, E. N. Botsas* and *S. A. Monroe*. 7.1, 29–36

Variable elasticity models for electricity demand. *W. A. Donnelly* and *M. Diesendorf*. 7.3, 159–162

Exhaustible resource economics

The competitive price of oil: some results under uncertainty. *C. Hope* and *P. Gaskell*. 7.4, 289–296
Deregulation as a switch of regime: price effects using a modified Hotelling rule. *F. Melese* and *P. Michel*. 7.2, 93–101
Effect of an essential input on isoquants and substitution elasticities. *S. Islam*. 7.3, 194–196
A general equilibrium framework for optimal planning in an oil-producing economy. *H. R. Seddighi*. 7.3, 179–190
Net benefit functions, discounting and the optimal time horizon for extracting non-replenishable resources. *K. Willett*. 7.3, 163–167
Is the spot market for oil products efficient?: some Rotterdam evidence. *O. Gjølberg*. 7.4, 231–236

Oil and gas supply and demand

The competitive price of oil: some results under uncertainty. *C. Hope* and *P. Gaskell*. 7.4, 289–296
Electricity and gas supply in south-eastern Australia, 1980–2020. *A. R. de L. Musgrove* and *K. J. Stocks*. 7.1, 37–48
Exploration and taxation: some normative issues. *S. D. Flåm* and *G. Stensland*. 7.4, 237–240
The GAO natural gas supply model. *C. E. Moody, P. L. Valentine* and *W. J. Kruvant*. 7.1, 49–57
Gas trade in the European Community during the 1970s: a model analysis. *J. Boucher* and *Y. Smeers*. 7.2, 102–116
A general equilibrium framework for optimal planning in an oil-producing economy. *H. R. Seddighi*. 7.3, 179–190
North Sea oil: responses to employment opportunities. *W. Elkan* and *R. E. D. Bishop*. 7.2, 127–133
Price controls, price dispersion and the supply of refined petroleum products. *V. B. Agarwal* and *R. T. Deacon*. 7.4, 210–219
A sensitivity analysis of the linear complementarity programming model: Appalachian steam coal and the natural gas market. *C. W. Yang* and *W. C. Labys*. 7.3, 145–152
Is the spot market for oil products efficient?: some Rotterdam evidence. *O. Gjølberg*. 7.4, 231–236
State gasoline consumption in the USA: an econometric analysis. *A. Lin, E. N. Botsas* and *S. A. Monroe*. 7.1, 29–36
Testing for stability: motor gasoline demand and distillate fuel oil demand. *N. D. Uri* and *S. A. Hassanein*. 7.2, 87–92

a new international journal from Butterworths

Economic Modelling

published quarterly

Chief Editor: Dr Homa Motamen, Imperial College, University of London
Associate Editor: Dr William Peterson, University of Cambridge

ECONOMIC MODELLING provides a much needed medium dealing exclusively with the theoretical development and applications of economic models. The journal's prime objective is to offer an international forum for continuous review of the state of the art in economic modelling.

The main subject areas covered include: national macroeconomic models; planning models; growth models; optimization models; international trade models; general equilibrium modelling of national economies; modelling structural adjustments; sensitivity of macroeconomic policies to econometric models.
